COMMON FEATURES FOR ALL SCHEMES

Risk Profile of the Schemes

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Different types of securities in which the scheme would invest carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern.

Trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity-related securities.

In case of investments in foreign securities, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market as well as country related risks.

Performance of the relevant indices will have a direct bearing on the performance of the index schemes. Tracking errors are inherent in any indexed fund and such errors may cause the scheme to generate returns, which are not in line with the performance of the relevant index or one or more securities covered by/included in the relevant index.

In case of sector funds, the schemes would primarily invest in the respective industry / sector thereby restricting the diversification of the scheme. Therefore, the performance of the scheme would be dependent upon the performance and market price movements of companies in the said industry/sector. Hence, movements in the NAV of the schemes would be more volatile compared to the NAV of a scheme with a more diversified portfolio.

In case of FBIE the investments under the scheme are oriented towards equity and equity linked instruments of companies engaged in the infrastructure related activities and hence will be affected by risks associated with the infrastructure industries. The performance of the Scheme would be dependent upon the performance and market price movements of companies in the infrastructure industry. Amongst the infrastructure industries as mentioned under the investment strategy, the majority of the equity / equity linked investments could be concentrated under a single or a few sectors.

While mid cap and small cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that mid/small cap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in small cap and mid cap stocks is more than investing in stocks of large well-established companies. Please note that over a time these two categories have demonstrated different levels of volatility and investment returns. And it is important to note that generally, no one class consistently outperforms the others. While smaller and medium size companies may offer substantial opportunities for capital appreciation, they also involve substantial risks. Historically, these companies have been more volatile in price than larger company securities, especially over the short term. Among the reasons for the greater price volatility are the less certain growth prospects of smaller companies, the lower degree of liquidity in the markets for such securities, and the greater sensitivity of smaller companies to changing economic conditions. Smaller companies carries large amount of liquidity risk compared to the Large Cap companies, as the ability to sell is limited by overall trading volume in the securities, which it invests.

In addition, smaller companies may lack depth of management, be unable to generate funds necessary for growth or development, or be developing or marketing new products or services for which markets are not yet established and may never become established. They could also suffer from disadvantages such as - outdated technologies, lack of bargaining power with suppliers, low entry barriers and inadequate management depth. Overall, the risks of investing in medium / small companies are (a) transparency/liquidity levels may not be on par with established, large companies; (b) corporate

governance may be an issue with some companies; and (c) they may not be resilient enough to withstand shocks of business/economic cycles.

Investments in debt instruments are subject to various risks such as credit/default risk, interest rate risk, reinvestment risk, liquidity risk etc. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Credit risk: This refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security).

Interest rate risk: This risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. Consequently, the NAV of the scheme may be subject to fluctuation. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term securities. This may expose the schemes to possible capital erosion.

Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). Liquidity risk is today characteristic of the Indian fixed income market.

Market risk: This risk arises due to price volatility due to such factors as interest sensitivity, market perception or the credit worthiness of the issuer and general market liquidity, change in interest rate expectations and liquidity flows. Market risk is a risk which is inherent to investments in securities. This may expose the schemes to possible capital erosion.

Reinvestment risk: This risk refers to the interest rate levels at which cash flows received for the securities in the Scheme is reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

Different types of Securitised Debts in which the scheme would invest carry different levels and types of risks. Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme.

Derivatives are high risk, high return instruments. A small price movement in the underlying security could have a large impact on their value and may also result in a loss.

The tax benefits available under the ELSS and other tax saving schemes are as available under the present taxation laws and are available only to certain specified categories of investors and that is subject to fulfillment of the relevant conditions. In view of the individual nature of tax consequences, each Investor/Unitholder is advised to consult his/her own professional tax advisor. The Trustee, AMC, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up before the completion of the lock-in period. Investors are requested to review the prospectus carefully and obtain expert professional advice with regard to specific legal, tax and financial implications of the investment/participation in the scheme.

There is no assurance or guarantee that the objectives of the scheme will be achieved. The past performance of the mutual funds managed by the Franklin Templeton Group and its affiliates is not necessarily indicative of future performance of the scheme.

Risk Mitigation Factors:

Equity

Liquidity Risk: The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks. FISC will endeavour to invest in a mix

of Smaller Companies and Other Companies stocks (as defined in the asset allocation) and also try to maintain a portion of investments in cash & liquid assets.

Concentration Risk: Except in case of sector funds and FBIE, the schemes will endeavour to have a well-diversified equity portfolio comprising stocks across various sectors of the economy. This would aid in managing concentration risk and sector-specific risks.

Generally, diversification across market cap segments also aids in managing volatility and ensuring adequate liquidity at all times.

Derivatives Risk: The fund will endeavour to maintain adequate controls to monitor the derivatives transactions entered into.

Debt

Interest Rate Risk: The Fund seeks to mitigate this risk by keeping the maturity of the schemes in line with the interest rate expectations.

Credit Risk or default risk: The Fund would predominantly invest in high investment grade fixed income securities rated by SEBI registered credit rating agencies. Historical default rates for investment grade securities (BBB and above) have been low.

Reinvestment Risk: Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

The schemes may take positions in interest rate derivatives to hedge market/interest rate risks.

Liquidity or Marketability Risk: The fund will endeavour to minimise liquidity risk by investing in securities having a liquid market.

Dividend Policy

Dividends are distributed based on the availability of adequate distributable surplus in the scheme. The Trustee may, at its sole discretion declare dividends in the fund at any time. Although there is every intention to declare dividend in Dividend Plan/Option, there is no assurance or guarantee as to the frequency or quantum of dividends nor that would the dividends be regularly paid.

No Load on Bonus/Dividend Reinvestment

No entry and exit load shall be charged on bonus units or units allotted on reinvestment of dividend.

Commission to distributor

The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder (AMFI registered distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Utilisation of Exit load

With effect from August 01, 2009, exit load/ CDSC (if any) up to 1% of the redemption value charged to the unit holder by the Mutual Fund on redemption of units shall be retained by each of the schemes in a separate account and will be utilised for payment of commissions to the ARN Holder and to meet other marketing and selling expenses. Any amount in excess of 1% of the redemption value charged to the unit holder as exit load/ CDSC shall be credited to the respective scheme immediately.

Any changes/alterations in the Application Form must be countersigned by the investor(s). The Mutual Fund/AMC will not be bound to take cognisance of any changes/alterations if the same are not so countersigned.

Prevention of Money Laundering

In terms of the Prevention of Money Laundering Act, 2002, the Rules / guidelines/circulars issued there under (AML Laws), Mutual Funds are required to formulate and implement a client identification programme, to collect, verify and maintain the record of identity and address(es) of investors.

It is mandatory for all investors (including joint holders, NRIs, POA holders and guardians in the case of minors) to furnish such documents and information as may be required to comply with the Know Your Customers (KYC) policies under the AML Laws. Applications without such documents and information may be rejected.

Submission of PAN:

In terms of SEBI circulars dated April 27, 2007, April 03, 2008 and June 30, 2008 read with SEBI letter dated June 25, 2007, Permanent Account Number (PAN) would be the sole identification number for all participants transacting in the securities market, irrespective of the amount of transaction, except (a) investors residing in the state of Sikkim; (b) Central Government, State Government, and the officials appointed by the courts e.g. Official liquidator, Court receiver etc. (under the category of Government) and (c) investors participating only in micro-pension. SEBI, in its subsequent letter dated June 19, 2009 has conveyed that systematic investment plans (SIP) of mutual funds up to Rs.50,000/- per year per investor shall be exempted from the requirement of PAN. Thus, submission of PAN is mandatory for all existing as well as prospective investors (including all joint applicants/holders, guardians in case of minors, POA holders and NRIs but except for the categories mentioned above) for investing with mutual funds from this date. Investors are required to register their PAN with the Mutual Fund by providing the PAN card copy (along with the original for verification which will be returned across the counter). All investments without PAN (for all holders, including Guardians, POA holders) are liable to be rejected.

In case of SIPs where the aggregate of instalments in a rolling 12 month period or in a financial year i.e. April to March does not exceed Rs.50,000/- (referred to as "Micro SIP") shall be exempt from the requirement of PAN. This exemption will be applicable only to investments through Micro SIP by individuals (including NRIs but not PIOs), joint holders, Minors and Sole proprietary firms. PIOs, HUFs and other categories of investors will not be eligible for this exemption.

However, for Micro SIP investors and investors residing in Sikkim a duly verified/attested copy of such document(s) as may be prescribed by the AMC/Trustee from time to time, needs to be submitted as the proof of identification in lieu of PAN Card copy along with proof of address.

All investments in Franklin Templeton Mutual Fund need to comply with the PAN and KYC requirements as noted above.

- In case of avallment of electronic payment of dividend and redemption facility, Franklin Templeton Investments cannot be responsible for errors or delays in processing the request due to errors in the information provided.
- As per SEBI circular No. SEBI/MD/Cir-10/22701/03 dated December 12, 2003 read with Circular No. SEBI/MD/Cir-14/2529/05 dated June 14, 2005, each portfolio under a scheme should have a minimum of 20 investors and no single investor should account for more than 25% of the corpus of such portfolio. Determining the breach of the 25 % limit by an investor – The average net assets of the scheme would be calculated daily and any breach of the 25% holding limit by an investor would be determined. At the end of the quarter, the average of daily holding by each such investor is computed to determine whether that investor has breached the 25 % limit over the quarter. If there is a breach of limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period.
- In each calendar quarter, on an average basis, each portfolio under an open end scheme shall meet with the above condition of minimum 20 investors, failing which the provisions of Regulation 39(2)(c) of SEBI (Mutual Funds) Regulations, 1996 would become applicable automatically without any reference from SEBI and accordingly, the portfolio shall be wound up by following the guidelines laid down by SEBI.
- Investors can avail online Account Access and full transaction capabilities, on our website www.franklintempletonindia.com. The HPIN Facility is currently available to all individual and non-individual investors other than those transacting through Channel Partners, on FTMF's website for all schemes for subscription, redemption or exchange. Investors can also tag together, and view from a single location, all their accounts (with the same order of names and mode of holding). In addition, a family access facility allows investors to consolidate holdings across investors if they desire. HPIN application forms are available for download from the website, or by sending an email to service@templeton.com. On receipt and verification of the form, investors will be issued an HPIN - using this, investors must create a username and password to access the site. For performing transactions through the HPIN facility, investors are required to furnish verified PAN, failing which the facility may be restricted to a "View Only" facility.
- Franklin Templeton has also introduced a facility for distributors to view their client accounts or transact on the web on behalf of their clients. Transaction can be effected provided the client has authorized the distributor by executing a Power of Attorney (PoA) in favour of the distributor for this purpose. The Power of Attorney must be submitted to the Fund before performing any transactions via the website.

Payment through electronic modes

- The redemption proceeds or dividend may be paid through various modes of electronic payments such as ECS / RTGS / NEFT / Direct Credit. Payment through RTGS can only be made when the amount paid is not less than Rs.2 lacs. Payment through NEFT / ECS can be made for all payments irrespective of value.
- Investors are requested to provide their bank's IFSC codes for RTGS/NEFT and MICR code for ECS. Investors need to provide a copy of cheque leaf (where the IFSC/MICR code is printed) or banker's confirmation for verification of the codes.
- Investors are requested to note that IFSC codes for RTGS and NEFT may be different for the same bank branch. Please contact your bank for the details of the same.
- Where the requisite information pertaining to the unit holder's bank account is available with FTME, the Mutual Fund / AMC may, at its discretion, endeavour to credit the redemption proceeds / dividend directly to the Unit holder's bank account instead of issuing a payment instrument. Similarly, the Mutual Fund / AMC, also reserves the right to issue a payment instrument despite of an investor opting for Electronic Payment.
- The Fund, Trustee or the AMC will not be responsible for any delay / non-receipt of electronic payment where it is attributable to any incorrect/incomplete information provided by the investor.
- RTGS / NEFT / ECS are facilities offered by Reserve Bank of India (RBI), for facilitating better customer service by electronic payment of dividend/redemption to an investor's bank account. This helps in avoiding loss of dividend/redemption warrant in transit or fraudulent encashment. Payments made through ECS/RTGS/NEFT are subject to applicable rules and policies of RBI and the working of payment system. It may be noted that there is no commitment from the Mutual Fund that this facility will be made available to the Unit holders for payment of dividend/redemption proceeds.
- Any charges levied by the investor's bank for receiving payment through electronic mode will be borne by the investor. The Mutual Fund / AMC will not accept any request for refund of such bank charges.
