COMMODITY & CURRENCY

MCX COMMODITY: Natural Gas (193)

Buy NG @ 193 SL 183 TGT 207

- NG, after making low of 110 in the month of June is taking big strides and reached 203 levels last week.
- In this upside move price has gained more than 82%. On weekly chart it has formed six consecutive bullish candle.
- Last week, it able to close above trend line resistance of 190. This trend line was acting as resistance from last six months. Closing above this line indicates some more upside is in store.
- If price is able to sustain above 190 levels we could soon see high of 207-210 levels. We will recommend to take long position on keeping stop loss to 183 levels.

MCX COMMODITY:

Zinc (195)

Sell Zinc @ 195 SL 200 TGT 185

- Zinc prices had excellent run up from lows of 123 which it tested in the month of March to recent high of 199.
- In this 61 percent surge price was holding above trend line and it made higher top higher bottom formation. But overall structure is wedge pattern.
- After reaching the top of 199 it is showing sign of exhaustion. First it made evening star candlestick pattern but found support at lower band. Last three consecutive weak candles are indicating that price could change its course.
- If it breaches support line of wedge pattern we could see some sharp fall to 185 levels.

INTERNATIONAL COMMODITY: COMEX Gold (\$1965)

Buy Gold @ \$1956 SL \$1925 TGT \$2015

- In international market Gold made all time high of \$2075 and from there on it fell quite sharply to \$1862 levels.
- But after testing this low, price is searching for direction and in this range bound period it has formed triangle pattern.

- Last Friday we witnessed strong closing where price was able break above the triangle pattern which is bullish sign.

NSE CURRENCY: USDINR (73.50)

Sell USDINR @ 73.50 SL 74.25 TGT 72.25

- USDINR tested high of 77 levels in month of April and this levels acted as short term resistance.
- Pair has changed its course from that levels and it is moving downwards with lower top lower bottom formation.
- In last week's trade, pair has move below important support of 74.80 and 74.50. If we look at daily candle of Friday which is strong bearish with high volume and moreover RSI is also in bearish zone, it indicates further downside is on the cards.
- We expect this down trend to continue and further low of 72.25 is possible.

NSE CURRENCY: JPYINR (69.79)

Sell JPYINR @ 70.05 SL 70.50 TGT 69.10

- JPYINR from last five month is trading in range between 72. to 69 levels.
- In this range bound movement price was exhibiting triangle pattern.
